

**REMARKS**

The specification is amended. No new subject matter is added. Reconsideration and allowance of the application is requested in light of the following remarks.

*In the Specification*

It has been indicated that although FIG. 17 is contained in the drawings, FIG. 17 is not listed in the Brief Description of the Drawings.

However, the applicants previously submitted, in the paper that was responsive to the final office action mailed on 21 November 2001, an amendment to the specification where it was requested that the following sentence be inserted following the brief description of FIG. 16:

Fig. 17 illustrates a power voltage applying line and a grounding voltage applying line.

Since it appears that this requested amendment was not entered, the applicants are resubmitting that amendment with this paper in order to overcome the NOTICE OF DRAWING INCONSISTENCY WITH SPECIFICATION that was mailed on 6 December 2004. The amendment is fully supported by the original application at, e.g., page 10, lines 1-2. A marked up replacement version of the Brief Description of the Drawings section is therefore presented with this paper that shows changes made relative to the immediate prior version. This of course assumes that the amendment to the specification that was described above was never entered in response to the office action mailed on 21 November 2001.

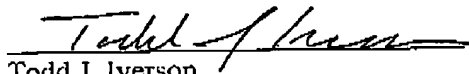

*Conclusion*

The applicant respectfully submits that the above amendments do not materially affect the application, and that the application remains in condition for allowance. Thus, the applicant requests that the above amendments be entered. The applicant understands that the deadline for payment of the Issue Fee continues to run from the mailing date of the Notice of Allowance.

Customer No. 20575

Respectfully submitted,

MARGER JOHNSON & McCOLLOM, P.C.

  
Todd J. Iverson
